Albyco D-160 Electric punching & manual binding

Electric punching and manual binding machine for 21-ring plastic binding rings

Punches up to 25 sheets, binds up to 450 sheets, paper chiptray, adjustable punching position. Handy and flexible solution for all kinds of binding assignments.

The machine is very compact and is easy to store and take out again and is immediately ready for use again.

The machine is equipped with an adjustable side attachment. This makes it possible to also process non-standard paper sizes. The D-160 has a maximum punching capacity of 25 sheets. This means that in the case of a document of about 45 sheets, punching must be done twice.

If plastic binding covers are also used, it is advisable to punch these endpapers individually.
